DETAILED ACTION

This office action is in response to the amendment filed October 13, 2004.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dave Longo on December 22, 2004 to distinguish its invention from prior art that showed a pad having a portion extending horizontally under which no copper was formed with a part of the pad with copper underneath and a subsequent conductive connection made to the pad, such that copper is underneath a portion of the conductive connection, but not under another portion of the connection. This concept is generally shown in Costrini et al. (U.s. 6,187,680).

The application has been amended as follows:

CLAIMS

In claim 16, line 8, after the word "film" insert - - only - -.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or make obvious an aluminum, Al, pad separated from a copper

wiring with a stacked intermediate layer of Ta and TaN wherein the TaN is on the Cu and the Ta is on the TaN and the Al is on the Ta with the Al having a horizontal portion under which there is no Cu pad and a conductive connection portion only connected to the Al at the horizontal portion including all the limitations of the independent claim.

The prior art discloses an intermediate layer of Ta and TaN between an Aluminum pad and Copper under layer as evidenced by Zhou et al. (U.S. 6,376,353) and Costrini et al. (U.S. 6,187,680) through a general recitation that the layer can be "TaN..Ta..and combination thereof," but fails to disclose or make obvious the claimed arrangement of the TaN on the Cu, Ta on the TaN and Al on the Ta with the Al having a horizontal portion under which there is no Cu pad with a conductive connection portion only connected to the Al at the horizontal portion under which no copper is formed.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
